## DETAILED ACTION

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 5, 2007 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 1612

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 3, 8-10, 12-27, 29-32, 35-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nutt et al., (Clinical Pharmacology and therapeutics, Vol. 15, Number 2, PP. 156-166) in view of Mayer et al. (US 5,556,838), Ockert (US 5,376,662) and European Patent Application 0 193 355.

Nutt et al. teach the use of an opioid agonist, methadone and an opioid antagonist naloxone in combination. The above reference also teaches that the mixture has significantly less miotic, behavioral and subjective effect than methadone alone. See the abstract. The primary reference differs from the claimed invention in specific opioid agonist of certain dependent claims, the opioid antagonist of the dependent claims and a non-steroidal anti-inflammatory compound, such as acetaminophen. Mayer et al. teach the use of the claimed opioid agonists as narcotic/ analgesics. See column 2, lines 52-68 and column 3, lines 5-25. Ockert teaches the use of the opioid antagonists for the treatment of pain. See the abstract. Ockert also teaches that opioid antagonists antagonize the exogenous opiates. See column 4, lines 8-11. The European Patent application teaches the use of opioid agonist, codeine in combination with acetaminophen for the treatment of pain. See the abstract. The concentration of codeine is taught on page 10, lines 8 and 9. The concentration of acetaminophen is taught on page 10, lines 10-12. It would have been obvious to a person skilled in the art

Art Unit: 1612

to combine an opioid agonist, an opioid antagonist and acetaminophen in combination, considering that the prior art teaches that each of the components have been used for the treatment of pain. The prior art also teaches that opiate antagonists reduce the side effects generated by opioid agonists.

One skilled in the art would have been motivated to combine the teachings of the above reference, since they in combination relates to the use of the claimed components individually for the treatment of pain. The relied upon references also teach the addition of opioid antagonists to opioids decreases the side effects associated with the use of opioids. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such claims 1, 3, 8-10, 12-27, 29-32 and 35-45 are rejected under 35 U.S.C. 103 (a).
